Re: Northwest Nassau Reliability Project

Dear Mr. Kushner:

On behalf of the Village Board of Trustees I am writing to inform you that the Board strongly opposes those aspects of the current National Grid Northwest Nassau Reliability Project which provide for the placement of a 24" gas transmission main through our residential neighborhoods, east of Washington Avenue. The Board requests that National Grid return to their original chosen path down Washington Avenue from Old Country Road to Stewart Avenue or to design an alternative route west of Washington Avenue that incorporates a path through the commercial district of the Village.

The Village will not allow any permits to be issued for excavation in our residential areas related to the National Grid Northwest Nassau Reliability Project. The Village is open to reviewing alternative routes within the Village.

Thank you.

Sincerely,

Ralph V. Suozzi
Village Administrator
